Abbott Named Top Dealmaker for Fourth Time

Citing Abbott leadership in emerging markets, U.S. magazine *The Deal* has named Abbott one of its "Most Admired Corporate Dealmakers" for the fourth consecutive year.

Abbott Recognized for Responsible Citizenship for Seventh Consecutive Year

For the seventh year in a row, Abbott has been named to the Dow Jones Sustainability Index (DJSI) – on both the North America and World lists – for continued leadership in responsible economic, environmental and social performance.

Abbott Provides Aid to Famine Victims in the Horn of Africa

The Abbott Fund, Abbott's philanthropic foundation, recently donated \$100,000 to humanitarian organizations working in Somalia, Ethiopia and Kenya to assist those impacted by the devastating drought and famine in those countries, where more than 12.4 million people are urgently in need of humanitarian assistance.

Featured Story

On February 22, Medtronic, Inc. announced its intention to divest the Physio-Control business. Medtronic first announced plans for divestiture in 2006 and their plans have been consistent since then. With the global economic situation beginning to stabilize, the timing is right to move forward with the divestiture.

Our markets

BioResearch

Lonza comprises the areas of Cell and Molecular Biology, Drug Discovery and applied research as well as quality control laboratory testing systems including tools for quality control tests for microbial detection.

Pharma&Biotech

We support emerging and established innovators of novel therapeutics from discovery through commercial supply with our manufacturing expertise, advanced technologies and high-quality products.

Nutrition

For human and animal nutrition we offer branded nutritional ingredients backed by scientific evidence and with clear benefits suitable for a wide range of product applications.

MicrobialControl

We offer antimicrobial products in the areas of hygiene, wood and water treatment applications.

Agriculture

We offer custom manufacturing of active ingredients and agrochemical intermediates for agrochemical companies, as well as the world's leading molluscicide Meta™ metaldehyde.

MaterialsScience

Our products and services are valued by key hightech industries such as aerospace, electronics, telecommunication, automotive, coatings, plastic and wood composites, textiles, powder metal and oilfield.

PersonalCare

We offer unique products and services to meet personal care development needs – from formulation to preservation and testing.

Global in reach. Specialized in focus.

Allergan, Inc. is a multi-specialty health care company focused on discovering, developing and commercializing innovative pharmaceuticals, biologics, medical devices and over-the-counter consumer products that enable people to live life to its greatest potential — to see more clearly, move more freely, express themselves more fully.

Our focus fosters deep engagement with medical specialists and we make it our business to listen closely to their needs so that together we can advance patient care. We combine this strategic focus with a diversified approach that enables us to follow our research and development into new specialty areas where unmet needs are significant.

In partnership with the medical community, we bring scientific excellence and rigor to deliver leading products that improve patient outcomes. And, we go above and beyond this to provide education and information, with the highest level of integrity, that helps patients to fully understand the choices available to them and make well-informed treatment decisions with their doctors. We know we are successful when doctors and patients place their trust in our products and our company, when our employees excel and when our efforts make a meaningful difference in the lives of the patients and communities we serve.

We are pleased to offer a number of leading products, including: BOTOX® (onabotulinumtoxinA), RESTASIS® (cyclosporine ophthalmic emulsion) 0.05%, LUMIGAN® (bimatoprost ophthalmic solution) 0.03%, BOTOX® Cosmetic (onabotulinumtoxinA), the JUVÉDERM® family of dermal fillers, and the LAP-BAND® Adjustable Gastric Banding System. Please look through this Web site for more information, including Important Safety Information, about these products and our full portfolio of products.

[About Amylin](#)[Products](#)[Research](#)[Responsibility](#)[Investors](#)[News](#)[Careers](#)

Amylin relentlessly pursues innovative solutions to improve the lives of patients living with diabetes and obesity.

Challenging science. Changing lives.

Amylin Pharmaceuticals is an exceptional company of extraordinary people. Their willingness to challenge conventional thinking as much as they challenge themselves, their resolve, resiliency and passion for the patient are improving the lives of millions.

The men and women of Amylin are discovering, developing, and bringing to market innovative therapies with life-changing potential for people struggling with diabetes and obesity—merging epidemics that are fast becoming the major health crises of our lifetime. In the process, they are building an exciting new franchise in the treatment of metabolic disease and a pipeline of possibilities for future healthcare solutions.

Building Blocks

The two building blocks upon which Amylin was founded—Challenging Science and Changing Lives—remain the cornerstone of our mission today. We hope this blog will serve as an additional means to convey our passion for protein and peptide science, and the potential of harnessing these molecular “building blocks” to treat metabolic diseases, and further our dedication to improving patients’ lives.

To learn more, visit the [Building Blocks](#) website.

Working together to enhance the care of patients with kidney disease

[Learn More](#)[Patient or Member](#)[Payors](#)[Physicians & Healthcare Professionals](#)

Company Overview

VillageHealth is comprised of a dedicated team of specially trained nurses and professionals providing integrated care management to patients with kidney disease throughout the US. We provide services to help improve the lives of our patients by working with them to prevent complications, reduce the number of avoidable hospitalizations and improve overall health.

VillageHealth is not a one-size-fits-all approach, but our integrated care management services are formulated to meet the unique needs of each patient. We work with you, your PCP and the entire care team to develop a personalized plan of care. Working together we can enhance the care of patients with kidney disease.

VillageHealth ICM Approach

Using an Integrated Care Management (ICM) approach, VillageHealth strives to make sure that valuable resources are used effectively, creating an enhanced patient experience and improved clinical outcomes. The VillageHealth ICM approach

- Coordinates care with the patient, physician(s) and provider
- Educates and engages patients to take an active role in their health care
- Provides a patient centric approach to care backed by proven [results](#)

For Surgeons

PelvAssist™ provides surgeons with precise implant positioning information, without the complication of traditional navigation.

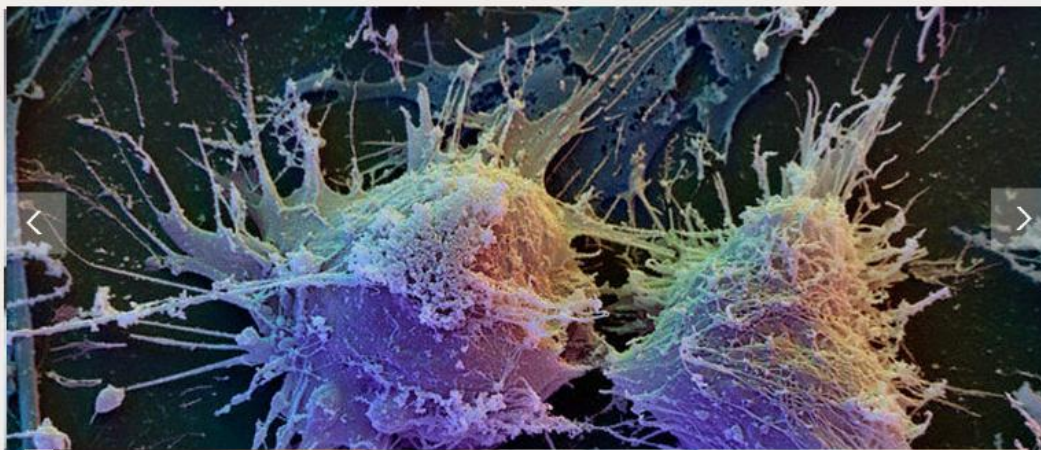

For Patients

Approximately 1 in 40 hip replacements are not properly aligned the first time and need correction. Our product gives patients peace of mind.

For Hospitals

Unnecessary revisions not only hurt the patient - they hurt a hospital's budget. PelvAssist™ saves dollars by reducing the risk of repeat surgeries.

ClonaCell™ Sample

Increase the probability of rare, high-quality and high-yielding clones with ClonaCell™.

CYCLOSET® (bromocriptine mesylate) is a first-in-class antidiabetic treatment that may lower your blood sugar, without increasing insulin.

GLUMETZA® (metformin hydrochloride extended release tablets) is indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. As with all metformin products, GLUMETZA has a boxed warning for lactic acidosis. Please click here for [Important Safety Information](#) and [Full Prescribing Information](#), including boxed warning.

ZEGERID® (omeprazole/sodium bicarbonate) is an immediate-release oral proton pump inhibitor (PPI) used in adults for up to 4 weeks to treat heartburn and other symptoms that happen with gastroesophageal reflux disease (GERD).

Technology advancements are being made every day with consumer electronics - why not translate many of those convenience and solutions into diabetes management. The time is coming to change your pump and how you view insulin pump therapy.

What is Pump Therapy?

[More](#)

At Tandem Diabetes Care, Inc. we're deep in the process of product development and are using patented, cutting-edge technology to provide what you've been asking for in insulin administration. Through the process of working with over 1,000 educators and pump users, we have developed a deep understanding of the unmet needs for pump therapy and we intend to address them.

Technology advancements aren't just for gadgets and entertainment – at least not anymore ... we're advancing your options and provide the solutions you want for diabetes management. Change your pump and stop changing your life.

Aiming to provide patients with innovative life-saving medicines

[Learn More](#)

1 2 3 4

Sangart is a global biopharmaceutical company dedicated to developing life-saving medicines specifically designed to enhance the perfusion and oxygenation of ischemic (oxygen deprived) tissues through targeted oxygen delivery. [Learn More About Sangart →](#)

Products [More](#)

During more than 30 years of extensive research, Sangart has refined the pegylation of human hemoglobin to create a proprietary molecule, MP4, with the ability to perfuse oxygen deprived tissues and carry oxygen through the circulatory system to prevent and treat ischemia (oxygen deprivation of tissues).

MP4OX

MP4OX is designed to deliver oxygen in the capillaries, where red blood cells may not naturally reach when the body is suffering from trauma-related ischemia. [Please click here for a short animation describing MP4OX's unique mechanism of action.](#)

MP4CO

MP4CO is designed to deliver therapeutic levels of carbon monoxide (CO) and then provide oxygen delivery for patients with sickle cell anemia suffering from a sickle cell crisis.

Product Pipeline

Sangart is developing a number of additional, earlier stage pipeline products based on its core technology and unique understanding of oxygen delivery.

Research [More](#)

Built on a strong foundation of scientific research, Sangart is dedicated to continuing its comprehensive clinical trial program to study and develop its products for patients in need.

Trauma

Studying MP4OX's ability to benefit patients suffering from trauma.

Sickle Cell Anemia

CRYOSTOR'S BENEFITS ARE CLEAR.

Preservation media that extends the shelf-life and transport time of your biologic source material and finished product.

VIEW CRYOSTOR'S PROTECTION IN ACTION

We develop next generation, patented **hypothermic storage** and **cryopreservation media** products that extend shelf life and improve post preservation viability and performance of cells, tissues, and organs.

Our Products

GMP, SERUM-FREE, PROTEIN-FREE BIOPRESERVATION MEDIA PRODUCTS

HypoThermosol®

Storage and Shipping Media

Proprietary, best-in-class serum-free, protein-free, GMP-grade storage/shipping media for cells, tissues, and organs

CryoStor®

Freeze Media Pre-Formulated with DMSO

Proprietary, serum-free, protein-free, GMP-grade freeze media for cells, tissues, and organs

BioLife Solutions manufactures and markets proprietary protein-free, serum-free cGMP biopreservation media for cells, tissues, and organs. We perform contract R & D and offer biopreservation protocol consulting. And for select customers, we perform custom formulation, fill, and finish services. [More about BioLife](#) →

Products

CryoStor®
Pre-formulated with 2, 5, 10%, or a custom volume of USP-grade

DMSO, CryoStor yields superior post-thaw cell viability, recovery, and function. Serum-free and protein-free!

HypoThermosol®
Protein-free, serum-free hypothermic storage

media are designed for maximum shelf life and shipping stability at 2-8°C.

BioStor®
cGMP cryopreservation media for freezing stem cells isolated from

umbilical cord blood, peripheral blood, and bone marrow. Formulated with 55% USP-grade DMSO, 5% USP-grade Dextran, and WFI-quality water.

Services

Contract Research

Leverage our expertise to optimize your biopreservation protocols.

Formulation, Fill, and Finish

Outsource your biopreservation media manufacturing to BioLife.
